Presentation Contents

Non-Writing

- List of Great Apes

- Picture of a Great Apes

Species Preservation

Great Apes

- ▶ Humans
- ▶ Bonobo
- ▶ Chimpanzee
- ▶ Gorilla
- ▶ Orangutan

General Ape Hand Characteristics

▶ Opposable Thumb

General Ape Hand Characteristics

- ▶ Opposable Thumb
- ▶ Sensitive tactile pads on digits

General Ape Hand Characteristics

- ▶ Opposable Thumb
- ▶ Sensitive tactile pads on digits
- ▶ Flattened nails for digit protection

Non-Human Great Apes

Table

Apes	Relation	Habitat
Bonobo	Close	Democratic Republic of Congo
Mountain Gorilla	Middle	Democratic Republic of Congo
Sumatran Orangutan	Far	Indonesia (Sumatra)

Table: A comparison of different great ape types to their relation to humans and the area in which they are located

Great Apes

he great apes are more diverse – and more threatened – than many of us ever expected. We recognize 14 kinds of great ape: four subspecies of gorillas, four chimpanzee subspecies and the singular bonobo, all found in Africa, plus five kinds of orangutans known from tropical Asia. Altogether the gorillas, chimpanzees and bonobo occur in 21 African nations; of the orangutans, two species occur in northernmost Sumatra, and the other (divided into three subspecies) survives on the island of Borneo.
